## Civil Engineer / Civil Designer

An exciting opportunity exists for an experienced civil engineer or civil designer to join our growing consultancy practice in Coffs Harbour.

Coffs Harbour is one of the key regional centres on the North Coast of New South Wales and is experiencing significant pressure for residential expansion to accommodate the existing population as well as people moving to the area. The area is expected to increase its current population of 70,000+ by over 30% by 2030. The area offers an unsurpassed coastal lifestyle and is a great place to raise a family. To view information on Coffs Harbour go to [www.chcc.nsw.gov.au](http://www.chcc.nsw.gov.au).

If you reside in a metropolitan area you may be eligible for the Regional Relocation (Home Buyers) Grant of \$7,000. To view information on the grant go to [www.osr.nsw.gov.au/benefits/rrg/](http://www.osr.nsw.gov.au/benefits/rrg/).

### The Company

Resource Design & Management Pty Ltd (RDM) is a progressive and award winning multi disciplinary company offering a broad range of services in the fields of engineering, planning, surveying, mapping and environmental management. It offers a comprehensive range of professional consulting services throughout northern New South Wales. To view further information on RDM go to [www.resdesman.com.au](http://www.resdesman.com.au).

### The Position

We are seeking to employ a self confident and motivated individual with at least five (5) years experience who enjoys working in a diverse and challenging environment where you are encouraged to use your technical experience with imagination, flair & innovation in producing practical and sustainable development outcomes for a broad range of projects.

The ideal candidate will hold degree or diploma level qualifications in civil engineering or a related field as well as having demonstrated experience and leadership in land & property development, civil design, project management, infrastructure and environmental projects.

The position will require you to use engineering judgement and analytical skills in a range of disciplines including land & property development, stormwater quality management, infrastructure, flooding & drainage, traffic and transport amongst others.

Experience with AutoCad, CivilCad, 12D, Music, MS Office and related software would allow a relatively seamless start.

The position could lead to further opportunities within the company for the right person.

Salary and conditions will be negotiable.

All enquiries will be treated in strict confidence and should be directed to Michael Lamont, Director.

Applications should be forwarded to:
